

# Körber WMS: Transforming Warehouse Audit & Compliance

Explore how the Körber Warehouse Management System (WMS) with its advanced Audit & Compliance Suite is revolutionizing warehouse operations.

Presented by: Saran Chandrasekharan Unnithan

# Industry Problem: Warehouses Lose \$60B Yearly from Errors

## Significant Financial Losses

Global warehouses annually incur over **\$60 billion** in losses due to prevalent issues like inventory inaccuracies, mis-picks, and compliance failures.

## Operational Inefficiencies

The increasing complexity of orders combined with critical labor shortages severely impacts operational efficiency and productivity.

## Lack of Real-time Visibility

Absence of transparent, real-time data leads to critical performance bottlenecks and untraceable errors, hindering effective decision-making.

# Current Gaps

## Manual Audit Processes

Traditional manual audits create significant inconsistencies and delays in quality reporting, making it difficult to maintain standards.

## High Mis-pick Rates

Inadequate validation checkpoints during picking lead to high mis-pick rates, directly affecting order accuracy and customer satisfaction.

## Cycle Counting Errors

Frequent errors in cycle counting processes compromise inventory accuracy, leading to stock discrepancies and impacting customer service.

## Lack of Standardized Documentation

Absence of standardized compliance documentation across different shifts and operations creates regulatory risks and inefficiencies.

# Körber WMS's End-to-End Warehouse Control

Körber WMS is a modular and scalable Warehouse Management System, trusted globally by 3PLs, manufacturers, and retailers for comprehensive operational control.

- **Automated Processes:** Streamlines and automates critical warehouse functions, including receiving, put-away, picking, packing, and shipping.
- **Integrated Technology:** Seamlessly integrates with cutting-edge robotics, IoT sensors, and existing ERP systems for a unified ecosystem.
- **Optimized Workflows:** Ensures standardized and optimized workflows across all operational areas, driving efficiency and reducing errors.

Körber Supply Chain

# Körber warehouse management solutions

Adaptability and scalability  
for small to mid-sized business

## Built-in Audit Suite : Process, Safety & Operational Audits

### Configurable Templates

Utilize flexible audit templates tailored for process efficiency, safety protocols, and regulatory compliance.

### Automated Triggers

Benefit from automated audit triggers based on predefined deviations or critical events, such as mis-picks or equipment malfunctions.

### Digital Compliance

Ensure digital checklist compliance for industry standards like OSHA, ISO, and internal Standard Operating Procedures (SOPs).

### Root-Cause Analytics

Gain deeper insights with root-cause analytics directly embedded into workflow processes for continuous improvement.

# Real-Time Dashboard : Error Hotspots & KPI Monitoring

Körber WMS provides intuitive visual dashboards that offer a clear overview of your warehouse operations, enabling proactive management.

- **Error Hotspot Identification:** Instantly pinpoint error hotspots across various zones, shifts, or Stock Keeping Units (SKUs).
- **Key Performance Indicator Tracking:** Monitor critical KPIs such as accuracy rates, cycle count variances, pick errors, and audit completion status.
- **Live Exception Monitoring:** Improve decision-making with live exception monitoring, allowing for immediate corrective actions.
- **Mobile Accessibility:** Access dashboards on the go with mobile-enabled features, empowering supervisors with real-time insights from anywhere.

# Business Impact

40%

## Accuracy Increase

Automated validation significantly boosts inventory accuracy and eliminates manual audit efforts.

20%

## Labor Reduction

Workflow automation reduces labor dependency, optimizing workforce utilization and costs.

35%

## Disruptions Decrease

Proactive error detection and compliance management cut down operational disruptions and violations.

These improvements collectively lead to better OTIF (On-Time In-Full) performance and heightened customer satisfaction.

# Use Case : How a 3PL Improved OTIF Using Körber

A prominent Third-Party Logistics (3PL) provider faced significant challenges with inconsistent picking quality and consequently, low On-Time In-Full (OTIF) delivery rates.

## The Solution

By implementing Körber's advanced audit suite, the 3PL gained the ability to perform real-time mis-pick validation, revolutionizing their quality control.

## The Impact

- Enhanced visibility led to proactive corrections, reducing errors before they impacted delivery.
- OTIF performance dramatically improved by 18% within just three months.
- Automated error detection capabilities significantly reduced labor hours, optimizing operational costs.

# How Körber Beats Other WMS Audit Solutions

## Deeply Integrated Workflows

Unlike external modules, Körber's audit capabilities are built directly into the WMS, ensuring seamless operation.

## Robotics Compatibility

Offers strong compatibility with modern automation and robotics, maximizing operational efficiency.

## Flexible Configuration

Provides flexible configuration options to meet industry-specific compliance requirements.

## Advanced Analytics

Delivers superior analytical capabilities compared to outdated legacy systems, empowering data-driven decisions.

# Final Pitch : ROI + Implementation Strategy

## Achieve Rapid Return on Investment

Körber WMS typically delivers a full ROI within a short period of 12 to 18 months, proving its value quickly.

## Structured Implementation Strategy

- **Process Mapping:** Standardize and optimize existing Standard Operating Procedures (SOPs).
- **Configuration:** Tailor audit templates to your specific needs.
- **Integration:** Seamlessly connect with ERP systems and automation technologies.
- **Training & Deployment:** Comprehensive training followed by phased deployment for smooth adoption.

Investing in Körber WMS drives long-term reliability, ensures robust compliance, and significantly reduces operational costs, securing your future in a competitive market.
